

TO WHOM IT MAY CONCERN

Ref. D/ME/1002/021120/Q/1197

Subject: Country of Origin for Datwyler products and solutions

Datwyler is a global player in the development and manufacture of products and solutions: for the IT infrastructure in data centres and intelligent buildings as well as for fibre networks.

We hereby confirm that all Datwyler products and solutions are manufactured by Datwyler factories throughout the world, which includes Europe, China and Asia Pacific and all production facilities are managed and controlled by the Quality Management Department based in Altdorf, Switzerland. Furthermore, we have a strong environmental and quality policy to facilitate these processes thus maintaining our reputation as the “quality manufacturer and supplier” in the industry.

We sincerely hope that the above explains our position and would summaries that whilst some products originate outside Switzerland, all our research, design and development activities are wholly based in Switzerland.

Yours faithfully,
Datwyler Middle East FZE

Ihab Gazawi
Head of Data Centre Experts

Ahmed Abdelaleem
Technical Manager
